About Me

Seeking a rewarding internship in Software Engineering, enhancing skills, collaborating with specialists, and expanding knowledge of best practices.

Academic Projects

Year 2 - Semester 1

Information Web Technology Project

Developed a basic web application with simple CRUD operations. The tool used for this Eclipse and for database MySQL. (PHP, JAVA, CSS, HTML)

Year 2 - Semester 2

Web Application Project

Our team developed a web application with CRUD operations for an online textile business. My part here was to ensure that the payment process was done properly. The tool used for this is Visual Studio and for the database MongoDB. (JavaScript, ReactJS, Express, NodeJS, HTML, CSS)

Year 2 - Semester 2

Mobile Application Project

A simple electricity bill calculator was created to calculate electricity bills due to the serve electricity bill charges in the country. Used database for this FireBase. (Kotlin)
